

KAILASH SUTHAR

MERN STACK DEVELOPER

Phone: 7426812368 | Email: kailashsuthar4488@gmail.com | Location: Rajasthan, India
GitHub: github.com/Sutharkailash4 | LinkedIn: linkedin.com/in/kailash-suthar-8a67263ab | Portfolio: sutharkailash4.github.io

PROFESSIONAL SUMMARY

Driven and detail-oriented MERN Stack Developer with a strong foundation in building scalable web applications using MongoDB, Express.js, React, and Node.js. Skilled in integrating AI APIs (like OpenAI and Gemini) to build intelligent features, alongside creating responsive user interfaces and RESTful APIs. Passionate about clean code, continuous learning, and contributing to collaborative, agile development environments.

TECHNICAL SKILLS

Languages: C, JavaScript (ES6+)
Frontend: HTML5, CSS3, JavaScript, React.js, Redux Toolkit, React Router
Backend: Node.js, Express.js, RESTful APIs, JWT, Socket.io, Nodemailer
Database: MongoDB, Mongoose ORM
Tools & Hosting: Git, GitHub, Postman, Render, Netlify, Vercel, ImageKit

KEY PROJECTS

Perplexity AI Chat Application

[Live Demo](#) | [GitHub](#)

- Built a full-stack AI-powered chat application using the MERN stack with JWT authentication and email verification.
- Integrated Google Gemini AI for intelligent chat responses and Mistral AI for automatic conversation title generation.
- Developed secure RESTful APIs using Node.js, Express.js, MongoDB, and Mongoose with robust validation and error handling.
- Built a responsive React.js frontend utilizing Redux Toolkit for global state management, React Router, and Axios.
- Implemented core features including multiple active conversations, full chat history, conversation management, protected routes, and dynamic toast notifications.

Productivity Dashboard

[Live Demo](#) | [GitHub](#)

- Built a responsive web dashboard using HTML, CSS, and Vanilla JavaScript with dark/light theme switching.
- Integrated external APIs using fetch and async/await to display live weather updates, location details, and daily quotes.
- Developed interactive features including a Pomodoro timer, hourly daily planner, and goal-tracking checklist.
- Created a dynamic task manager using JS DOM manipulation to add, remove, and highlight important tasks.
- Optimized UI responsiveness across mobile, tablet, and desktop screens using custom CSS media queries.

Food Recipe Application

[Live Demo](#) | [GitHub](#)

- Built a responsive React.js recipe application featuring complete CRUD functionality for creating, updating, viewing, and deleting recipes.
- Implemented LocalStorage-based authentication and structured state management using the React Context API and custom hooks.
- Utilized React Router DOM to enable seamless SPA navigation across authentication, main recipe feeds, and user favorites.
- Developed interactive features including favoriting recipes, toast feedback, custom form validation, and dynamic content filtering.

EDUCATION & CERTIFICATIONS

Full Stack MERN Development Certification

Sheryians Coding School

2026

Higher Secondary Education (12th Grade)

Rajasthan Board
